LARGE DIAMETER ATLAS

Single Jersey Ultra Fine Gauge Machine Without Sinkers.

LARGE DIAMETER

ATLAS

● ATLAS

Atlas is the outcome of the continuous development of the market and its request to obtain garments not only with good looking and dressing functions also having high technical performance (Intelligent Textile). The fabric is produced without sinkers, the stitch formation is not distorted by any mechanical movement and the risk of any sinker line in the fabric is totally absent. Machine is equipped with special holding-down jacks (patented by Santoni) which allow to work at full feeds and make the knitting re-start fast and easy after a fabric pressoff. The Atlas line technology with its reduced friction between the parts has allowed for distinct reduction in energy consumption.

| 34" | 4260 | 4704 | 5328 | 5760 | 6600 | |

* gauge 80 is suitable for jersey fabric only

| Standard equipment |
|---------------------------------------------|
| Side creel without top tubes |
| Positive feeding units |
| Cam shells prepared to receive 2 cam tracks |
| Automatic lubrication device |
| Mechanical take-down system |
| Open width frame |

| Optionals |
|----------------------------------------|
| Lycra feeding units |
| Electronic controlled take-down system |
| Frame for tubular fabric |
